SuperESD - SELC3Dxx1UA

1. Description

The SELC3Dxx1UA Series are ultra-low capacitance transient voltage suppressor arrays, designed to protect applications such as portable electronics and smart phones. This series is available bidirectional configurations and is rated at 350 Watts for an 8/20us waveshape. At higher operating frequencies or faster edge rates, insertion loss and signal integrity are a major concern. This series offers a ultra-low capacitance and low leakage current in a miniature SOD-323 package.
