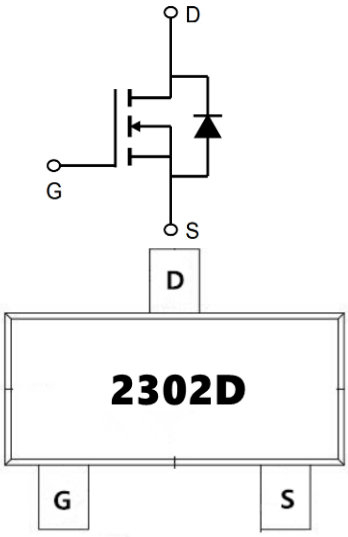
ZS2302DI

20V N-Channel Enhancement Mode MOSFET

Description

The ZS2302DI uses advanced trench technology to provide excellent $R_{DS(ON)}$, low gate charge and operation with gate voltages as low as 2.5V. This device is suitable for use as a Battery protection or in other Switching application.



General Features

V_{DS} = 20V I_D =2.8A

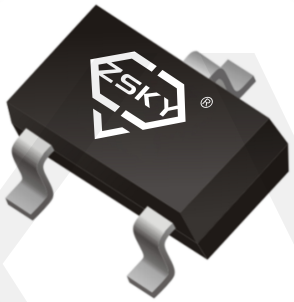
$R_{DS(ON)}$ < 56mΩ @ V_{GS}=10V （**Type：35mΩ**）

Application

Battery protection

Load switch

Uninterruptible power supply



Package Marking and Ordering Information

Note :

1、The data tested by surface mounted on a 1 inch^2 FR-4 board with 2OZ copper.

2、The data tested by pulsed , pulse width ≦ 300us , duty cycle ≦ 2%

3、The power dissipation is limited by 150℃ junction temperature

4、The data is theoretically the same as I_D and I_{DM} , in real applications , should be limited by total power dissipation.

Attention

1,Anyand all ZSKY Microelectronics products described or contained herein do not havespecifications that can handle applications that require extremely high levels of reliability, such aslife support systems, aircraft's control systems, or other applicationswhose failure can bereasonably expected to result in serious physical and/or material damage. Consult with your ZSKY Microelectronics representative nearest you before using any ZSKYMicroelectronics productsdescribed or contained herein in such applications.

2,ZSKY Microelectronics assumes no responsibility for equipment failures that result from usingproducts at values that exceed, even momentarily, rated values (such as maximum ratings, operatingcondition ranges, or other parameters) listed in productsspecifications of any and all ZSKY Microelectronics products described or contained herein.

3, Specifications of any and all ZSKY Microelectronics products described or contained hereinstipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of thedescribed products as mounted in the customer ’ s products or equipment. To verify symptoms andstates that cannot be evaluated in an independent device, the customer should always evaluateand test devices mounted in the customer ’ s products or equipment.

4, ZSKY Microelectronics Semiconductor CO., LTD. strives to supply high quality high reliabilityproducts. However, any and all semiconductor products fail with some probability. It is possible thatthese probabilistic failures could give rise to accidents or events that could endanger human livesthat could give rise to smoke or fire, or that could cause damage to other property. Whendesigning equipment, adopt safety measures so that these kinds of accidents or events cannotoccur. Such measures include but are not limited to protective circuits and error prevention circuitsfor safe design, redundant design,and structural design.

5,In the event that any or all ZSKY Microelectronics products(including technical data, services)described or contained herein are controlled under any of applicable local export control laws andregulations, such products must not be exported without obtaining the export license from theauthorities concerned in accordance with the above law.
